

Conference on Robotics in Education – RiE 2027

Prague, Czech Republic

May 26-28, 2027

Call for Papers

The 18th International Conference on **Robotics in Education** (RiE) brings academics, researchers, teachers, practicing engineers and industry experts from all over the world onto a common platform.

We encourage you to submit your works about innovations, advances, and practical experiences in the area of Robotics in Education as well as Education in Robotics.

Suggested topics include, but are not limited to:

Robotics in school and its curricula
Didactic approaches in educational robotics
International trends in educational robotics
Methodologies for teaching robotics
Evaluation criteria and tools
Assessment and evaluation of robotics activities
Problem-based learning and robotics
Exemplary robotics projects in classes
Integration of robotics in school curricula

Web-based and remote robotics and simulation
Educational robotics platforms
Constructivism/constructionism and robotics
Cognition, natural and automated cognitics
AI in robotics at schools
Robotics contests and their educational impact
Humanoid robots in education
Dextrous autonomous robots and humanoids
Robotics through edutainment

Organisers:

Charles University, Prague, Czech Republic
Slovak University of Technology, Bratislava, Slovakia

Important dates:

January 31, 2027 Paper submission
March 15, 2027 Acceptance notification
March 31, 2027 Early registration
April 15, 2027 Camera-ready papers
May 26-28, 2027 The Conference
